GOVERNMENT OF HIMACHAL PRADESH

AGRICULTURE DEPARTMENT

NOTIFICATION

Simla-5, the 26th September, 1967

No. 22-32/63-Agr.II. —The Lieutenant Governor, Himachal Pradesh is pleased to order the supersession of the Annexure I attached with the Himachal Pradesh "High Quality Cauliflower Seed Production Order" issued by the Government of Himachal Pradesh vide Department of Agriculture, Notification No. 22-32/63-Agr. II, dated the 29th May, 1967 and its substitution by the revised Annexure I attached hereto.

By order
B. S. SINGH,
Secretary.

REVISED ANNEXURE I

Cauliflower is a cross-pollinated crop. Therefore, in order to produce high quality seed it is necessary to adopt the following precautions:—

1. *Isolation.* (a)—Seed crop of Cauliflower should be isolated by 1 mile distance (crow flight) from other varieties of cauliflower and other Cole Crops like Cabbage, Knolkhol, Brussels sprout, Kale, Karam Sag etc., grown for seed production.

(b) Seed of only those varieties of cauliflower may be raised in different zones which are notified by the Director of Agriculture, Himachal Pradesh Simla from time to time, who will also notify the agencies for maintaining foundation seeds stocks, for laying out field and seed standards and to do the inspection and certification. Any other variety except the one notified will not be grown for seed production in that specific zone.

(c) The word zones as above will mean the areas of cauliflower seed production of a particular notified variety of cauliflower.

2. *Roguing.*—(a) When the curds are formed, some plants do not form the curds and thereby directly bolt. Again there may be plants which do not come upto the prescribed standard of purity of the variety. Such plants are termed as off-types and/or sub-standard. Such plants should be uprooted. The plants left for seed production should be true-to-type form compact snow-white curds and should be free from seed borne diseases.

(b) Plants considered as off-type or sub-standard by the inspecting staff will be uprooted by the cultivator and not left in the field to flower. A crop rejected as not true-to-type or sub-standard by the inspection staff will be uprooted by the cultivator and not allowed to flower and set seed in the field.

(c) In case of the concerned cultivator not uprooting the crop, it will be uprooted at Government expenses, which expense will be later recovered as land revenue from him.

3. To maintain uniform field and seed standards, all cauliflower seed crops grown in Himachal Pradesh, will be got inspected and rogued by an inspecting agency to be named by the Director of Agriculture, Department of Agriculture, Himachal Pradesh or his authorised agents.

4. The inspecting staff in the above paras will mean the staff or agency deputed, for the purpose of roguing and certification by the Department of Agriculture, Himachal Pradesh or by the agencies who have been authorised by the Director of Agriculture, Himachal Pradesh.

5. *Spraying the crop against pests and diseases.*—Cabbage butterfly caterpillar and aphids are two serious insect pests and cauliflower. It is, therefore, necessary to spray the crop at a reasonable interval of 7-10 days to maintain the health standards of the crop for the production of quality seed.

6. Any other cultural practice(s) recommended from time to time by the Department of Agriculture, Himachal Pradesh will be implemented by the cultivators.
